

## Happy accident

The secret to accidental success  
seems substantial under initial duress  
in pursuit  
of the good.

Wading through eternal mess  
and then trying a little less.

Preparing aswell as enduring trials  
to find bounty beside trodden paths.  
Obviously the minor addition pales,  
compared to endurance-based wraths.  
But there is no great harvest  
if none beside the perfect is commanded to meet the behest.

Honestly I just celebrate  
having found a song  
as I hold back a paranoid threat  
of shamefull worrysome thought among  
the neighboring desire to dance.  
Since success is the result of chance.
