Happy accident

The secret to accidental success seems substantial under initial duress in pursuit of the good. Wading through eternal mess and then trying a little less.

Preparing aswell as enduring trials to find bounty beside trodden paths. Obviously the minor addition pales, compared to endurance-based wraths. But there is no great harvest if none beside the perfect is commanded to meet the behest.

Honestly I just celebrate having found a song as I hold back a paranoid threat of shamefull worrysome thought among the neighboring desire to dance. Since success is the result of chance.
